SUMMARY:

Full-Stack AI Engineer with 3+ years of experience designing, developing, and deploying scalable SaaS applications using the MERN stack (React, Next.js, Node.js, Express, MongoDB, PostgreSQL). Proven expertise in AI/ML integration using OpenAI and Gemini, and workflow automation with n8n. Skilled in robust backend development (20+ REST APIs, 99.9% uptime) and modern DevOps practices (Docker, AWS, CI/CD, Microservices) to deliver high-performance, intelligent, and production-ready systems.

TECHNICAL SKILLS:

Frontend

React.js, Next.js, Zustand, React Query, Tailwind CSS

Database

PostgreSQL, MongoDB, Supabase

AI/ML

Python, OpenAI, Gemini, Pgvector RAG, Vector Embedding, LangChain

Backend

Node.js, Express.js, REST APIs, Prisma ORM, Graph API

DevOps

Docker, AWS, CI/CD, Microservices, Monitoring, Nginx, Secrets Management

Languages & Tools

TypeScript, JavaScript, WebRTC, WebSockets, MediaSoup, n8n, Zapier

Experience:

YC SOLUTIONS - Full Stack & AI Developer (January 2025 – Present)

- Architected and delivered production-grade AI SaaS applications using React, Node.js, and TypeScript, incorporating comprehensive dashboards and Role-Based Access Control (RBAC).
- Engineered a scalable AI Interview Bot leveraging OpenAI and n8n to automate technical question generation and provide objective candidate feedback.
- Managed full deployment lifecycle across AWS, utilizing Docker and Nginx, and established CI/CD pipelines to ensure scalable, high-availability infrastructure.

ENCS - Backend Developer (August 2023 – December 2024)

- Developed and optimized over 20 REST APIs using Node.js/Express, integrating JWT for secure authentication and fine-tuning PostgreSQL/MongoDB queries for performance.
- Achieved 99.9% application uptime by resolving critical production bugs, refactoring 15+ legacy API endpoints, and implementing robust security measures (input validation, rate limiting, and environment secret management).

PROJECTS:

[BuyUp- Ecommerce-Store](#)

Tech Stack: Next.js, React.js, TypeScript, Tailwind CSS, JWT, Google OAuth 2.0, MongoDB, Node.js

- Architected a scalable, SEO-optimized e-commerce platform that achieved a PageSpeed score of 95+ and reduced initial load times by 50%.
- Implemented Role-Based Access Control (RBAC) to securely manage administrative, seller, and customer roles, enhancing system integrity.

[AI Telecaller](#)

Tech Stack: Node.js, Express.js, TypeScript, Prisma ORM, PostgreSQL, n8n, REST APIs, OpenAI, Google OAuth 2.0

- Developed an inbound telecaller SaaS that automates call handling and follow-up workflows, reducing manual lead qualification time by 75% using n8n and OpenAI.
- Built a robust, type-safe backend utilizing Prisma ORM and PostgreSQL, ensuring zero downtime during schema migrations and data integrity.

[WEBRTC Meeting Software](#)

Tech Stack: WebRTC, MediaSoup, Node.js, Express.js, WebSockets, React.js, PostgreSQL

- Engineered a full-featured, low-latency meeting platform (video/audio, live chat, screen sharing) achieving under 150ms video delay for sessions with up to 8 participants via MediaSoup.
- Optimized for low-latency performance with reliable session and state management.

Education:

- Bachelor of Science in Computer Science — GCUF, 2019 – 2023
